Question:
I want to connect to the Virginia Tech wireless network on a public computer, such as in a computer laboratory, or on a mobile device that was temporarily loaned to me. How do I access the wireless network without the computer or device storing my credentials?

Answer:
For instructions, see [Connecting to Virginia Tech's Wireless Networks on Public Computers and Shared Devices](https://vt4help.service-now.com/kb_view.do?sysparm_article=KB0010159).
