Create your network password

IT Status

On July 16 2014, HOKIES account credentials, used to login to computers in the university Windows domain and Exchange email accounts, will no longer be used to authenticate to network services, specifically wireless and VPN.

If you currently authenticate to the VT-Wireless network or VPN using your HOKIES account credentials, you must CONFIGURE YOUR DEVICES TO USE YOUR NETWORK PASSWORD before July 16, 2014 to avoid any disruption of service.

Your network password is different from your PID password. Instructions for creating or changing your network password can be found at
