Email blacklisting

IT Status

Over the weekend there were two phishing emails targeted at vt.edu accounts. This has caused some email accounts to be compromised and used to send out spam. The spam being sent from @vt.edu addresses has caused several outside organizations to have us placed on their blacklists. We are working to resolve the issue. For more information on phishing and what to do if you think you may have responded to a phishing email see this article: https://computing.vt.edu/content/phishing
